colour	EW
Breed	100% BBL
Date of birth	2017-02-02
Gest. length days	279
Gestation length	94
Calving ease	126
Straw colour	Purple

Shaun is a BB bull, specifically bred for beef on dairy purposes. His sire, and his dam's sire, are both well recognised for their use as beef on dairy crosses. Shaun shares the same family as Lucas, Ben, Ugo and Rein van het Boszicht. This family followed a circuitous route before arriving at the stud in Grashoek. His grand dam produced Dino and we expect the first results of this bull to be announced soon. Dino is a half-brother of Shaun's dam.

This Boszicht pedigree has always performed to full satisfaction for K.I. SAMEN so we have the fullest confidence in offering and using Shaun. Shaun transmits a shorter than average gestation time and descends from a line of good beef on dairy bulls, including Lucas, Rein and Dino who are still currently available. Shaun combines two very successful bloodlines in the beef on dairy segment, as his sire Noud can also be found at the Plashoeve stud. Noud is a very reliable, proven bull, who partners short gestation times with maternal ease of calving.

For this latter trait, Shaun scores 4.5 out of 5 stars.
