Herdbook number	NL 863695436	Gestation length	278
A.I.-code	36270	Kappa Casein	AB
aAa code	534	Beta Casein	A1/A2
colour		Cow family	
Breed	100% MRIJ	Straw colour	Beige

Silva's Ajax, is a well developed typical bull. Ajax has good muscularity with very good feet & legs. In his pedigree we find a high production in combination with high longevity scores.

Ajax sire is Ajax 94, a bull with one of the highest productions of the MRIJ population. He knows to maintain the percentages on the same level. For conformation improves Ajax 94 mainly on feet & legs and muscularity.

Longevity and production are strong points of Ajax dam line. Ajax dam was a well developed cow with very good udder (VG 88). This cow had an impressive average lactation value of 112+ during her first 6 lactations! The production of this 10 year old cow is very high.

An important bull in Ajax pedigree is probably grandsire Julius. Many descendants of Julius produced more than 100.000 kg (220.000 pounds) milk. Also his daughter Silva 84 realized in her first 6 lactations a lactation value of 114+ with a very good udder (VG 87).
