Westellen Diego M734 is a son of the No.1 index beef bull Lord Blackwood. Blackwood scored a maximum of 5 stars for maternal characteristics, meat index, carcass weight, carcass quality and milk of his daughters.

In short, an absolutely good top bull to use from whom not much semen is currently on the market. Diego M734 was already impressive as a young calf, who only got better with age. He possess the extra muscling of an Angus and has plenty of capacity and the appealing Angus head. Given his extra length and his strong topline in combination with his excellent temperament all adds up to make him a worthy successor to his sire.

Diego M734 is a sure choice for breeders of meat, as well as for mother animals, and belongs to the top in Ireland.
