The Warsi cow family is no stranger to K.I. Samen. Bulls from this family have been used regularly over the years. However, K.I. Samen had never tested a bull from the line that produced Wilskracht Allianz P RF (Abundant x Jacuzzi x Bram) before. This line has really stepped out into the spotlight in recent years. A cow that played a significant role in this development is Warsi 879, the grand dam of Allianz RF. This very attractive Bram daughter scored 93 points for overall conformation in 2023 and was crowned reserve champion at the last HHH show. She not only has exemplary conformation, she is also extremely productive having given more than 50,000 kg of milk to date noting an average LV of 127! As well as being the dam of bull sire Warhero, she also produced a worthy successor in her daughter Warsi 1112. Sired by Jacuzzi and registered with 89 points, Warsi 1112 produced milk with high components (average LV 114) but unfortunately had to be culled early due to intestinal complaints. Warsi 1112 was flushed, which combined with Jaffa resulted in three daughters who scored 86, 87 and 88 points respectively for overall conformation. Progeny including Allianz P RF were the result of a flush from Warsi 1112 with Abundant a year later.

Abundant is responsible for passing on the...
