

Alger Meekma

Breeder: Wilskracht Genetics, Vriezenveen

- + From the Warsi family
- + Correct conformation
- + Healthy udders
- + High components
- + Homozygous polled
- + A2A2

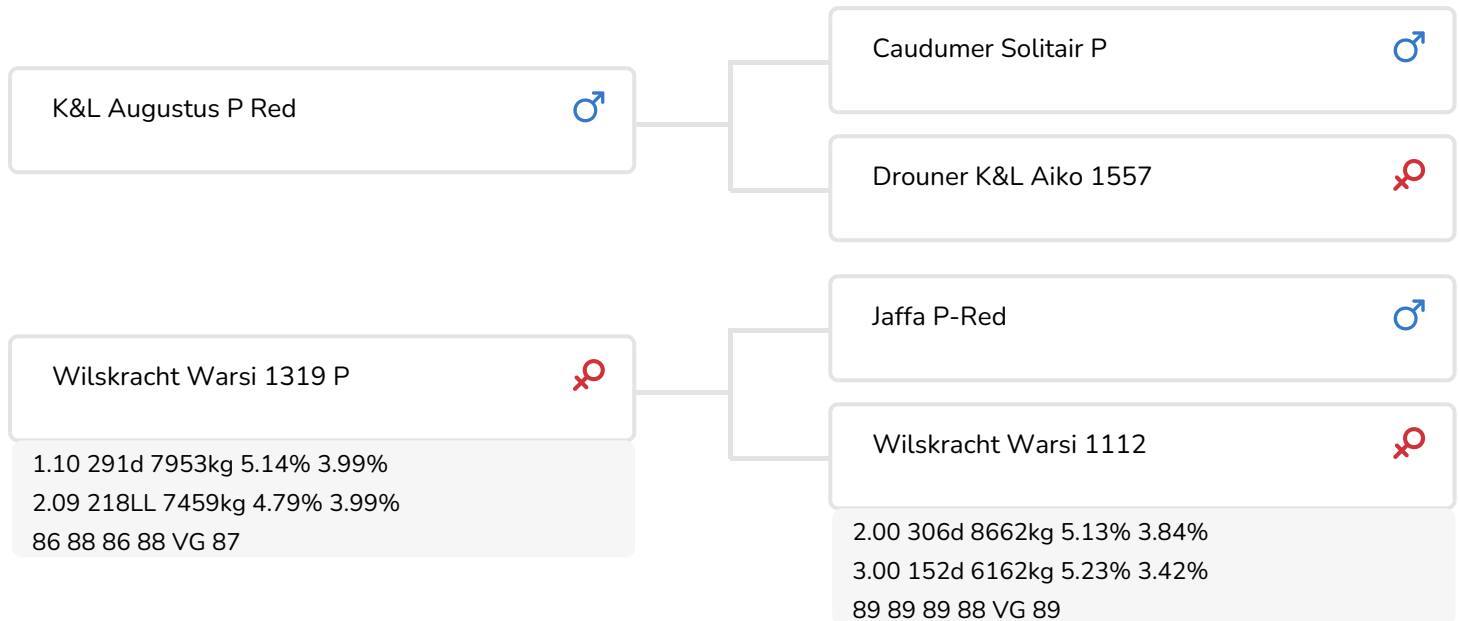

Alger Meekma

Wilskracht Warsi 1319 P (VG 87)  
Dam of Aspire Red PP

## BULL INFORMATION

Name	Wilskracht Aspire Red PP	Date of birth	2022-09-09
Herdbook number	NL 694803699	Gestation length	276
A.I.-code	361321	Kappa Casein	AB
aAa code	423	Beta Casein	A2/A2
colour	RB	Cow family	Warsi
Breed	100 % HF	Straw colour	Geel

The Wilskracht Warsi family line assumes its position in the polled segment with Aspire Red PP. As the son of Augustus P Red, Aspire PP has a daughter-proven paternal line and a particularly impressive maternal line.

His mother, Wilskracht Warsi 1319, is a well developed, component-rich and highly fertile second calf cow. As a heifer, she first calved at 1.10 years, and calved again at 2.09 years, which was a month earlier after the following lactation. In this list, the protein percentage is predicted at more than 4%. Further along the line is Warsi 1112 (dam of Allianz P), the now influential brood cow and bull dam who unfortunately died too young. Another generation on, we find the famous Bram-daughter Wilskracht Warsi 879, also a brood cow and bull dam.

Aspire PP offers a complete package: an excellent proven pedigree, daughter-proven bloodline, homozygous polled and beta casein A2A2.
