

Alger Meekma

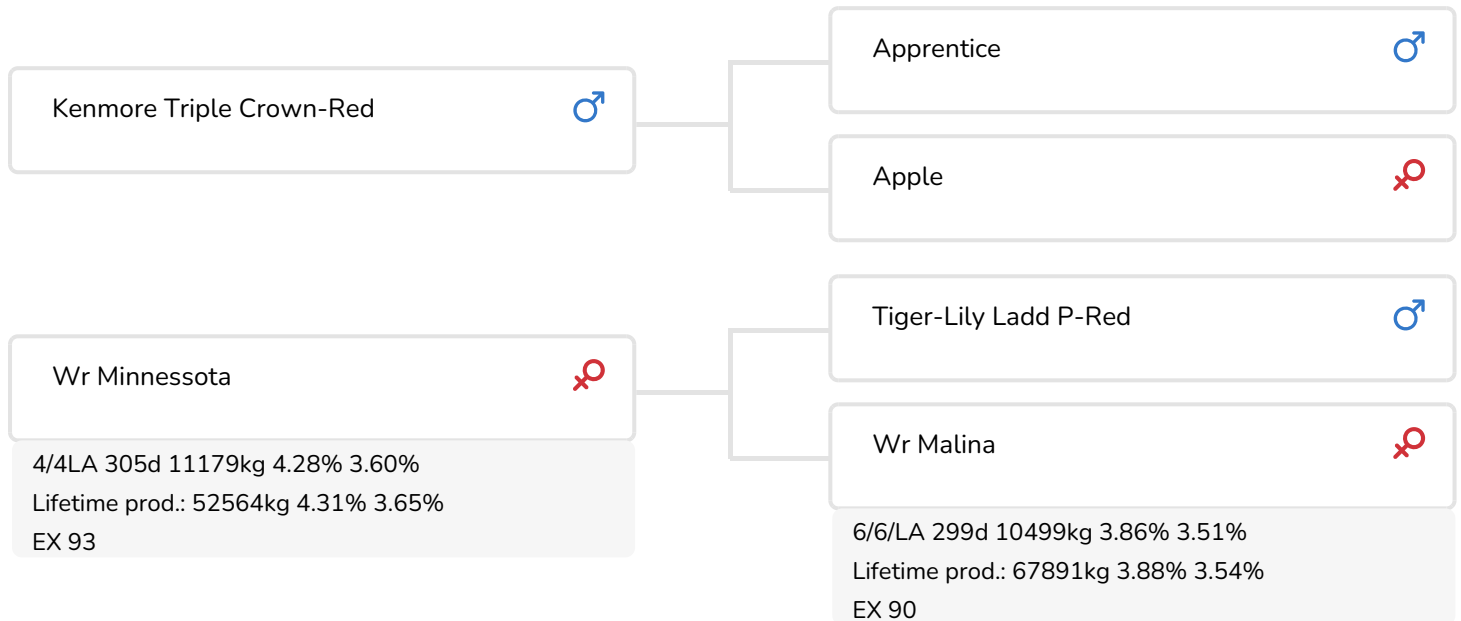

Breeder: Ludger Hubert Wiewer, Drensteinfurt, Duitsland

- + Pedigree with top bull sires
- + Correct conformation
- + Super longevity
- + Outcross

BULL INFORMATION

Name	WR Mason	Date of birth	2019-07-21
Herdbook number	DE 0541017313	Kappa Casein	AA
A.I.-code	361211	Beta Casein	A1/A2
aAa code	423	Cow family	Morelle
colour	RB	Straw colour	Red
Breed	100% HF		

In the quest for other bloodlines, the level of the conformation and/or production in the lineage of the bull often fails to meet the necessary criteria. The red-and-white Holstein bull WR Mason (Crown x Ladd P x Tableau) passed the test with flying colours. Mason not only offers an alternative bloodline in his sire's pedigree, but his maternal line is also definitely outcross. Other strengths of this impressive bull include the protein percentages and conformation.

Mason's sire Crown is a North American red-and-white Holstein bull with a pedigree that includes a considerable contribution by black-and-white bulls. Crown is noted as a bull who transmits high-calibre conformation, combined with copious milk production. He also scores well for fertility and durability and partners above-average milk speed with a favourable somatic cell count.

The secondary traits and milking speed Mason's inherits from Crown are also seen in Mason's grand sire Ladd P and great-grand sire Tableau (via his maternal line). Over time, the very good breeding values of both bulls have shown extreme consistency. The stable traits of the cows in the maternal line are super conformation (94 x 90 x 90 x 93), very good protein percentages (at least 3.50%) and good lifetime production. Talking of which:...
